## Glossary

### Approved Retirement Fund

An Approved Retirement Fund (ARF) is a post-retirement investment plan, used by an individual to transfer the balance of their pension fund to this product. The individual then withdraws retirement income from this ARF as needed, rather than buying a pension annuity.

Income when taken from an ARF is Irish source income and is assessable to Irish income tax, Universal Social Charge and potentially Pay Related Social Insurance.

### Capital Acquisitions Tax (CAT)

CAT is Irish gift and Inheritance tax. This tax is assessable when an Individual received inheritances/gifts in their lifetime<sup>10</sup> which exceed certain Group Threshold levels. The current CAT rate is 33%. The Group Threshold level vary depending on the relationship between the beneficiary and the deceased (e.g. child and parent). Further details can be seen [here](#).

Inheritance Tax Agreements are in place between Ireland and the UK and USA.

### Pay Related Social Insurance (PRSI)

Most individuals with Irish income, pay PRSI into the national Social Insurance Fund. In general, 4% PRSI is payable until age 66. It is not payable on pension annuity payments.

### Standard Fund Threshold

The Standard Fund Threshold (SFT) is the maximum Irish pension fund an individual is allowed at retirement for tax purposes. This is a lifetime limit and includes all pension benefits taken since 7 December 2005. The SFT is currently €2 million.

At the point of taking retirement benefits and/or transferring benefits overseas, any amount over the Individuals available SFT is subject to tax at the higher rate of income tax, currently 40%. This tax will be taken before benefits are paid to individual /transferred overseas.

### The Universal Social Charge (USC)

The Universal Social Charge is an Irish tax introduced in 2011 and is payable in addition to Irish Income Tax. USC is payable where an individual's total annual income exceeds €13,000<sup>11</sup>. USC is deducted by the Pension Scheme or ARF Provider, directly from the income prior to payment to the individual.

Details on current USC rates can be seen [here](#).
